My dear Sir Madhavarao

I wonder if you could do anything to expedite the grant for fitting the laboratory. When I was asked last year to cut down my supplemental estimate for that work to the very lowest limit I was promised that I would be able to use this year esti. mate at the very beginning of the year (July 1st). Depending on this I naturally put work in hand which without this provis

would have been left undone and as a result I am Rs 370 in debt which I shall be unable to pay till the grant of Rs. 3705 asked for in my budget and detailed (by request of Government) in my letter No. 457 of June 22 nd is sanctioned.

I am in rather an awkward position on account of the long delay in sanctioning the estimate and the work suffers of course on account of it. Something over a month ago Mr. Christensen promised to have the matter looked into and my last reminder was dated Sept 15 at Mercara. I should be grateful if you could hurry up matters.

The amount I owe is principally
carpenters wages.

Yours sincerely
A Lehmann

P. S. I promised to send some
grass seeds some in your compound
unfortunately the varieties in which
I traded must of those sent me from
America many for you ago. all practically
useless. Now of them germinated with-
me. May I send you some of the
English grasses I have just received?
They appeared very well with me.

Note - Continued.

The enquiry ordered above was made in this office No. Il 574 of 9th October 1901, and the Comptroller states in reply that as no provision is made for the expenditure in question under 19 Scientific and Minor Departments (8) Agricultural Department, an additional grant is necessary according to article 158 of the Civil Account Code Vol I. But article 158 requires a reappropriation statement to be accompany every application for sanction of unprovided for expenditure. The statement should show how the expenditure is proposed to be met. In the case in question, the Agricultural Chemist does not propose any reappropriation but wants an additional grant

The Secretary to the Government of Mysore,

Dear Sir,

In reply to Government Order No. 9638-40 R.F. 12-1900 dated 4th June 1901 I beg to enclose herewith a Summary for the estimate of Rs 6,000/- asked for the piping and fitting of the Laboratory for the next year. This estimate does not include the fittings &c required for the hall, which is to serve the purpose of an Agricultural Museum, nor for the apparatus room in which the apparatus not in use are to be stored to protect them from the fumes invariably present in the Laboratory. In the apparatus room it is also intended to store the chemicals of which a considerable quantity ought to be kept on hand on account of the great distance

distance we are from the source of supply. Owing to the present financial depression I have not included these fittings, as I hope to be able to get along with little inconvenience without these rooms until next year, when it is hoped that the Government will be able to sanction a sum of Rs 2000/- or possibly Rs 3000/- for this purpose.

I have the honor to be,
dear Sir,
your most obedient Servant.

In reply to his docket No. Fl. 196-R.F. 12-1900, of 6th August ~~6th~~ 1901 regarding the estimate of ₹3705. for fitting and furnishing the remainder of the Laboratory, has the honour to state that the same is very urgent indeed. the undersigned has already reserved for next year the fitting and furnishing of about one half of the building now in course of erection as this could be left over for one year without very seriously retarding the work at the laboratory. But unless the ₹3705. can be granted the work of the department must suffer very considerably.
